

# ALLEGRO™ FW800

## FIREWIRE® PCI ADAPTER CARD

### KEY FEATURES

- ▶ Easy installation
- ▶ Three 9-pin FireWire 800 (1394b) ports
- ▶ Fully backward-compatible with FireWire 400 (a.k.a. i.LINK®, 1394a)
- ▶ Works in 64-bit or 32-bit PCI slot
- ▶ Hot-pluggable and hot-swappable device connection

Part No: FW800

### GET YOUR DATA TRANSFER SERVED UP HOT!

Do you feel the need for speed? Sonnet's Allegro FW800 PCI adapter card will satisfy your burning desire. Transmit files between your computer and FireWire 800 devices at up to a scorching 800 Mb/s. It's ideal for meeting the demands of video and pro audio applications, where high-speed and high-bandwidth data throughput are essential. This easy-to-install interface plugs into any available PCI slot, and instantly connects you to the fastest peripheral connection available today.

### SPECIFICATIONS

#### Software

Operating System Requirements

- Mac OS X 10.2.3 is required for FireWire 800 operation; version 10.2.5 is recommended. Operates at FireWire 400 speeds under Mac OS 9.x through Mac OS X 10.2.2
- Windows XP†

#### Hardware

Compatible Models

- Power Macintosh G3, Power Mac G4 (all models except Cube), and Power Mac G5 (with PCI or PCI-X slots only)
- Pentium II class or higher PC
- 64-bit, 33 MHz PCI
- Works in 64-bit or 32-bit PCI slot
- Supports all industry-standard FireWire 800 peripherals
- Fully backward compatible with FireWire 400 devices
- Three 9-pin FireWire 800 ports
- 3-year limited warranty
