KEY FEATURES

► Dual PowerPC G4 7447A CPUs running at 1.8 GHz

► 512KB speedy L2 cache per processor running at processor speed

► Supports Mac® OS 9.2 and Mac OS X Version 10.3.5 and higher

► Delivers multiprocessing power for a fraction of the cost of a new system

► Auto-configures to host system's logic

► No switches or control panels

MAKE YOURS A DOUBLE!

Can your Power Mac keep up with OS X and the latest apps? Give it a double-shot speed boost when you install a Sonnet Encore/ST G4 Duet dual processor card! The Duet combines the strength of two fast G4 processors in an upgrade that easily handles the demands of today's processor-intensive applications—now you can use GarageBand™ and Final Cut Pro® with power to spare!

Installing the Duet is straightforward and takes just minutes—just run a simple firmware updater and swap processor cards. The performance gains are impressive—your Mac will be capable of performing more tasks at the same time, each faster than ever before. And the quality is first rate—Sonnet backs its processor cards with a 3-year, limited warranty and free technical support. The Encore/ST G4 Duet accelerates your Power Mac ahead of the pack!
