TEMPO™ eSATA DATA CABLES

THE SIMPLE WAY TO CONNECT

eSATA to eSATA Cable

eSATA to SATA I Cable

KEY FEATURES

▶ Designed to connect a SATA host controller like Sonnet's Tempo SATA E4P or Tempo SATA X4P, or Tempo-X eSATA 4+4 or Tempo-X eSATA 8 to Serial ATA

▶ Robust external Serial ATA (eSATA) connectors engineered for better retention—springs similar to USB—designed for over 5,000 insertions and removals

▶ Extra shielding and metal contacts provide better EMI protection

▶ 1 meter in length

▶ Two styles offered—eSATA-to-eSATA, or eSATA-to-SATA I

Your Connection to the Outside!

Tempo eSATA cables don't compromise—why should you? When using an eSATA Serial ATA host controller and connecting external drive enclosures, you need Tempo eSATA cables! Unlike thin, internal SATA cables, these cables offer superior shielding and connectors with metal contacts to provide enhanced EMI protection and improved durability required for external use. These cables adhere to the design specifications recommended by the Serial ATA International Organization (SATA-IO), and are built to last.
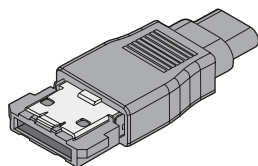

HARDWARE COMPATIBILITY

TCB-SATA-2/1 connects a host controller card with eSATA connectors to an external drive enclosure with SATA I connectors.
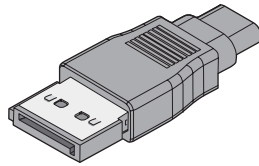

TCB-SATA-2/2 connects a host controller card with eSATA connectors to an external drive enclosure with eSATA connectors.

TECHNICAL SPECIFICATIONS

Part #	Contents
TCB-SATA-2/1	1-meter external Serial ATA data cable with one eSATA connector and one SATA I connector
TCB-SATA-2/2	1-meter external Serial ATA data cable with two eSATA connectors

eSATA connector

SATA I connector
