COMPATIBLE MAC MODELS

- iMac 233 MHz*
- iMac 266 MHz*
- iMac 333 MHz*

*Rev. A-D

Note: These models have tray-loading CD-ROM drives.

FASTER G3 PROCESSOR AND ADDED FIREWIRE

The Sonnet HARMONi™ G3 pushes the performance of your “original” iMac to new levels, and enables you to enjoy expanded capabilities! Employing a powerful 600 MHz IBM PowerPC G3 processor with on-chip 256K Level 2 cache operating at full processor speed, HARMONi will transform your iMac with a performance boost of up to 2.5x or more over the original system. The HARMONi also features a FireWire port to connect digital cameras, DV camcorders, DVD-R/CD-RW drives, and iPod digital music players. FireWire is perfect for importing/working with digital video; everything you do on your iMac will feel faster!

MAC OS COMPATIBILITY

The HARMONi is compatible with your existing hardware, software, RAM and peripherals. The HARMONi integrates with your system software, supporting from Mac® OS 8.6[†] through OS 9.2.2, and Mac OS X Version 10.1 through Version 10.3.9.

SIMPLE INSTALLATION

While dealer installation is recommended, technical users will find the HARMONi installation straightforward using the step-by-step, illustrated instructions. Launch the included Sonnet application to take advantage of the original system software. Simply shut down and open the system, remove the original processor, move your existing RAM to the HARMONi, pop the HARMONi into place, then install the FireWire daughter card and new side panel for the system. Restart the system and you're up and running!

TECHNICAL SPECIFICATIONS

Part #	G3 Speed	Size/L2 Cache Speed
HAFW-G3-600	600 MHz	256K/600 MHz

PERFORMANCE COMPARISON

Photoshop 6.01 Gaussian Blur 10		iTunes 2.03 MP3 Encode	
G3/233	25 seconds	G3/233	7:54 minutes
G3/600 HARMONi	13 seconds	G3/600 HARMONi	2:52 minutes

Performance results on a 40MB TIFF file | Audio CD track 10:27 minutes in length

[†] FireWire requires Mac OS 8.6 or later; best compatibility with FireWire devices is achieved with OS 9.1 or later, and OS X Version 10.1 or later.
