

iPod Battery

LOVE YOUR
iPOD EVEN
LONGER™

Play more, charge less

Reinvigorate your iPod® with a high-capacity battery from Sonnet! All iPods use batteries that can only be recharged so many times, and their charge capacities get smaller as time passes. If your iPod doesn't play as long as it used to, give it a boost with one of our iPod replacement batteries—it's a great, economical way to give new life to your player.

Replacing a battery in an iPod is not like replacing the batteries in a TV remote—you'll need specialized tools and instructions, and we provide that. From special non-marring case opening tools to our short, high-quality, instructional videos, everything you need is in the package. Sonnet batteries let you love your iPod even longer!

High capacity 3.7v iPod battery.

Fast charge capable.

Playtimes up to 20+ hours.

Easy to follow, detailed video instructions (English, French, German, Japanese) on included CD-ROM.

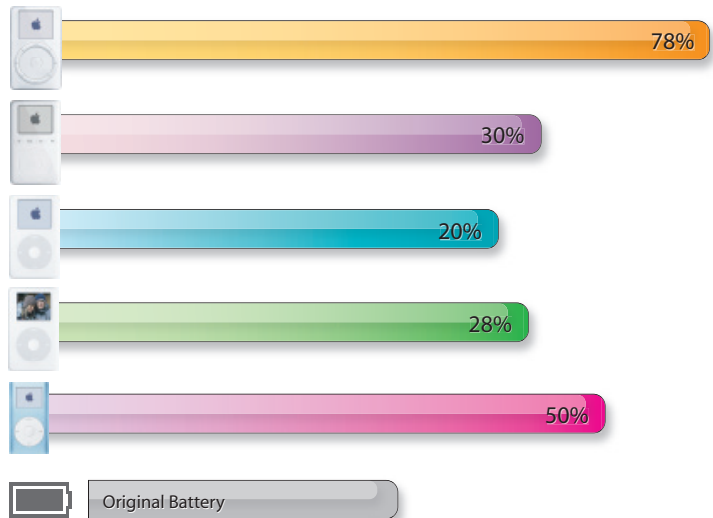

All tools required to perform the replacement.

Lasts Up to 78% Longer Than Your Original Battery!

Your iPod with a Sonnet battery
