# PRESTO PPC

- **Up to 1000% faster**
- **100 MHz PowerPC™ 601 processor**
- **1MB Level 2 cache built-in**
- **Mac OS 8.5 compatible**
- **Utilize "Accelerated for Power Macintosh" applications**
- **Run Microsoft Office**

PowerPC Performance

With the Presto PPC™ processor upgrade card, Sonnet™ continues the tradition of offering innovative upgrade solutions for older Macintosh® computers. Featuring a 100 MHz PowerPC 601 processor with 1MB of built-in Level 2 cache, the Presto PPC upgrades a lower 68040-based Macintosh Quadra or Centris into a fast PowerPC machine. Offering performance equivalent to a Power Macintosh 7500, the Presto PPC delivers a 500% performance gain. Now you have the advantage of utilizing "Accelerated for Power Macintosh" and PowerPC-only software, such as Microsoft® Office.

100% Compatibility

The Presto PPC is compatible with your existing hardware, software, RAM, and peripherals. There is no need to purchase additional hardware or add memory. The Presto PPC seamlessly integrates with your system software, supporting the latest innovations and enhanced performance of Mac® OS 8.5.
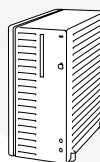

Simple Installation

The Presto PPC is easy to install with step-by-step, illustrated instructions. Simply update your system software[1], open your computer, and plug in the Presto PPC processor upgrade card[2]. Presto! You are PowerPC accelerated. As an added bonus, Sonnet provides proprietary Mac OS Enabler software to upgrade to Mac OS 8.5. Sonnet backs the Presto PPC with an industry-leading, three-year manufacturer's warranty.

Compatibility

Compatible Macintosh Models

Part # Q700-100-1M
- Quadra 610,[2] 650, 700, 800, 900, 950
- Centris 610,[2] 650

Technical Specifications

Part #	PPC Speed	L2 Cache Size
Q700-100-1M	100 MHz	1MB

Adapter Board for Quadra/Centris 610

Part #	Installs Into	Provides
Q700A-610	PDS slot	Right-angle adapter passes through PDS slot

Performance Comparison

Quadra 700	100
Quadra 700 with Presto PPC Processor Score	500
Quadra 700 with Presto PPC Floating Point Score	1130

0   100   200   300   400   500   600   700   800   900   1000   1100

Performance results based on MacBench 4.0 processor scores

[1] The Presto PPC card requires a universal system software installation of System 7.1.2–Mac OS 8.5 to make your computer PowerPC compatible.

[2] Quadra/Centris 610 requires adapter part # Q700A-610.
