- (1) Must reinstall driver and authorize manufacturer in Security and Privacy System Preferences.
- (2) Myricom NIC cards no longer supported by Sonnet. Contact [CSPi](#) for support. CSPi does not currently support macOS 10.14. Sonnet is working with CSPi to update the drivers.
- (3) Updated drivers available from [ATTO Technologies](#).
- (4) Booting from RAID is not supported in Mojave or High Sierra.
- (5) Breakaway Box 350 and Breakaway Box Developer Edition are not compatible with 2018 13" MacBook Pro 15,2, and may not be compatible with some future Macs.
- (6) P2 functional. SxS cards hot plug only when connected over Thunderbolt. CF cards don't mount.
- (7) To read SxS cards, must reinstall [Sony driver](#) and authorize manufacturer in Security and Privacy System Preferences.
